HAND CARRY AXLE JACK

942AS100

Our Hand Carry Axle Jacks are designed to meet jacking specifications for normal tire/wheel and brake replacement, and in most cases for both main and nose landing gears for most business, commuter, narrow and wide body airplanes. This jack provides maximum capacity within a light weight and compact configuration for ease of carrying and transporting to the jacking site and is completely self-contained with manual hand pump.

942AS100
