PORTABLE CABIN PRESSURE TEST UNIT
15-7605-6010

The 15-7605-6010 Portable Cabin Pressure Test Unit creates pressure to check for leaks throughout the aircraft and verify the cabin pressure is safe for flight. The quiet manner allows for quick discovery of cabin leaks by technicians. The unit comes in a suitcase style carrying case offering increased mobility and readiness. It is compatible with shop air or a portable electric/diesel driven high volume air compressor, making it the most versatile cabin pressure tester on the market.
